

Course Setup Instructions

Step 1: Login to Databricks.

Log into Databricks:

1. Open Chrome or Firefox.
2. Navigate to your Databricks environment (each installation of Databricks is commonly referred to as a **shard**).
 - For the **Community Edition** shard, use <https://community.cloud.databricks.com>.
 - If you don't have a **Community Edition** account, you can sign up for a [free account](#) now.
 - If you are using a an Azure, Amazon, or private Databricks deployment, please consult with your employer for the URL, username, and password.
3. Sign in with your email address and password.

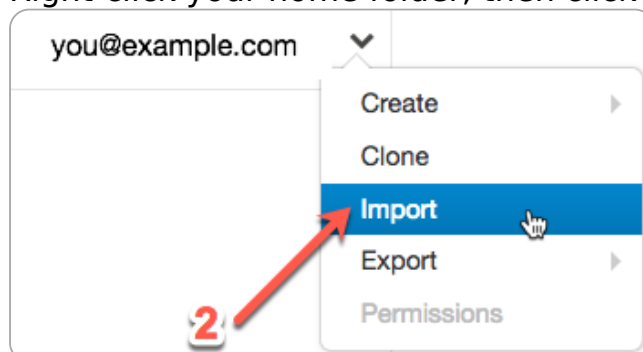

Step 2: Import the lab files into your Databricks Workspace:

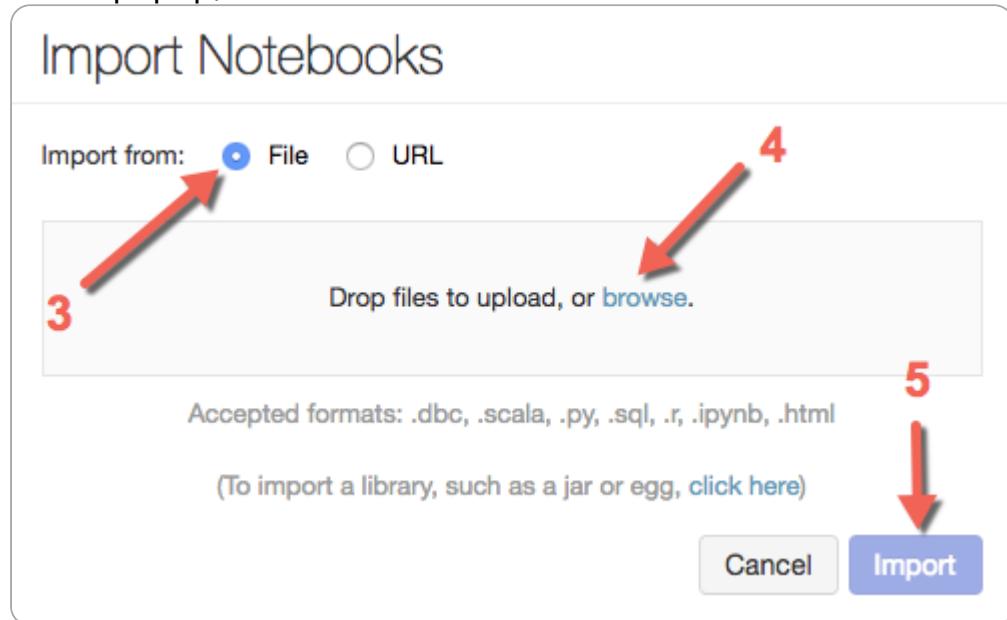

1. In the left sidebar, click **Home**.

2. Right-click your home folder, then click **Import**.

3. In the popup, click **File**

4. Select **browse** and then choose your course **Lessons.dbc** file
5. Click the **Import** button
6. Wait for the import to finish. This may take a few minutes to complete.

Step 3: Start the course.

Open the course:

1. Click the **Home** icon in the left sidebar.
2. Select your home folder.
3. Select the subfolder matching the name of your course (e.g. Dataframes, ETL-Part-1, etc).
4. Open Lesson 01-Getting-Started.
